PVCu and composite entrance doors

... welcome to a grander entrance that's guaranteed to last!

Smooth in operation, stylish in appearance and virtually maintenance free. In fact everything you would expect from a range of doors of such exceptional quality.

Each and every door is tailor made from the finest materials to offer you a time enduring and attractive means of access.

Beneath the water repellent and hardwearing PVCu exterior lies a strong and dimensionally stable structure that, unlike wood, will not warp or distort. Where necessary, reinforcement is incorporated to further strengthen the structure and a multi-point locking system helps to secure the door firmly in its frame.

The combination of flexible compression gaskets and energy efficient double glazing provides an effective weathertight seal and the thermal and acoustic properties of the doors themselves act as additional insulation against the cold and any outside noise.

All in all, it adds up to a warmer, more secure solution and, with hardly any maintenance required and a host of designs and styles to select from, you can be sure that there really is no grander entrance to grace your home!

Washable and weatherproof for long lasting good looks.

PVCu is an excellent insulator and the multi-chamber construction of the door further enhances its ability to reduce heat loss.

Building regulations **Document L* compliant**

Used with the correct glazing specifications, PROFILE 22 windows meet the improved energy efficiency requirements of the government's new Buildings Regulations **Document L***.

Antique Oak on white

Composite doors

An opportunity to express yourself in glorious technicolour! Composite doors come in a range of colours and woodgrain finishes as well as white that

perfectly mimic the look of a traditional timber door. The difference is, that unlike wood, you don't need to worry about the maintenance. Constructed from a laminated ply frame with an insulating, synthetic foam core encased in a weather resistant PVCu skin inside and out - composite doors are rigid, secure and an increasingly popular choice.

Available in a choice of colours and PVCu panel designs to suit your particular property

...many more designs available*
